### Technology Solution Services

EIT provides value-based solutions specializing on the network infrastructure. We offer cost-effective and efficient options for our clients to meet their key business objectives & goals without affecting the organizations day-to-day business. EIT's certified professionals provide the onsite expertise needed for time-constrained projects as well as provide staffing services. We tackle all areas of network planning, design, implementation, optimizing, telecom audits, disaster recovery planning & testing, network management, security, emerging technologies, wireless services and training.

#### EIT offers distinct advantages to our Clients:

**Flexibility.** EIT will accommodate the client's requirements without jeopardizing the client business objectives or goals.

**Resourcefulness.** EIT will deliver the personnel services required by the client. We take pride in delivering on the difficult, one-of-a-kind requests.

**We go the extra mile.** At our client's engagements we have delivered truly exceptional performance.

EIT is focused on the infrastructure of the network. People, Process and Technology are the three most important components to making an organization's network successful. Our Network Business Consultants look at the strategic plan, IT expenditures, budgets, organizational planning, and total cost of ownership as well as return on IT investment.

EIT's services are broken down into four areas:
